

REMARKS

Claims 25 and 26 are presently pending. Claims 1-24, 27, and 28 were rejected. Claims 14-25 are cancelled.

Claims 25 and 26 are rejected under 35 U.S.C. 102(e) as being unpatentable from U.S. Patent 6,795,450, ("Mills").

Claim 25 is amended to recite, among other limitations, "detecting an amount of traffic, a link, battery usage with an absence of AC power and a power state of the communication system". Although Examiner has indicated that the [Mills] system determine an absence of AC power since the system can determine a power on event", Assignee respectfully submits that Mills does not teach or fairly suggest "detecting an amount of traffic, a link, battery usage with an absence of AC power and a power state of the communication system".

Accordingly, Examiner is requested to withdraw the rejection to claim 25 and dependent claim 26.

Conclusion

For at least the foregoing reasons, each of the pending claims in the application are allowable, thereby making the application in a condition for allowance. A notice to that affect is respectfully solicited. The Commissioner is

hereby authorized to charge additional fee(s) or credit overpayment(s) to the deposit account of McAndrews, Held & Malloy, Account No. 13-0017.
